

## MBA CET 2026 Second Attempt: Mock Test Strategy to Fix Mistakes & Maximize Percentile

MBA CET 2026 has introduced a two-attempt format, giving aspirants a valuable second chance to improve their scores. If your first attempt did not go as planned, the second attempt becomes your biggest opportunity to improve your percentile and secure a better college.

The better score from the two attempts is expected to be considered, which makes preparation between both attempts extremely important.

The biggest game-changer between Attempt 1 and Attempt 2 is **how you use mock tests**.

### **Why Mock Tests Matter Before the Second Attempt**

Many students give mocks only to check scores. That approach is incomplete.

Mocks help you:

- Identify weak areas
- Improve speed and time management
- Build the right attempt strategy
- Increase accuracy under pressure
- Learn smart question selection
- Reduce exam-day stress

Your second attempt should be based on performance data, not guesswork.

### **Step 1: Analyze Attempt 1 Honestly**

Before starting mocks, review your first attempt carefully.

Ask yourself:

- Which section consumed the most time?
- Where did accuracy drop?
- Did you panic during the paper?
- Which section gave easiest marks?
- Did you leave too many questions?
- Where did you waste time unnecessarily?

This analysis becomes the roadmap for Attempt 2.

### **Step 2: Use Mocks the Right Way**

Do not give mocks just for the sake of numbers.

Instead:

- Attempt full-length mocks regularly
- Simulate actual exam timing
- Practice sitting for the full duration
- Test different section orders
- Try new attempt strategies
- Focus on improvement after every mock

The goal is to become smarter with every test.

### **Step 3: Analyze Every Mock Deeply**

Giving mocks without analysis wastes effort.

After every mock, review:

#### **Accuracy Errors**

Questions you knew but marked wrong.

#### **Time Traps**

Questions where you spent too much time.

#### **Easy Questions Missed**

Questions that should have been attempted.

#### **Section-Wise Output**

Which section gave maximum marks in minimum time?

#### **Guesswork Errors**

Random attempts without logic.

Maintain a **Mock Mistake Register** and revise it before every next mock.

#### **Section-Wise Mock Strategy**

##### **Logical Reasoning**

- Usually the highest scoring section
- Practice puzzles, arrangements, critical reasoning
- Learn when to skip lengthy sets

## **Quantitative Aptitude**

- Focus on Arithmetic and DI
- Attempt easy sitters first
- Avoid getting stuck on one question

## **Verbal Ability**

- Improve reading speed
- Attempt paragumbles, vocabulary and grammar-based questions smartly

## **Abstract Reasoning**

- Daily practice helps a lot
- Fast and scoring section for many students

## **Golden Rule for Attempt 2**

Since there is **no negative marking**, maximize smart attempts—but avoid blind guessing.

Your target should be:

- High attempts
- Controlled accuracy
- Better speed
- Calm decision-making

## **Common Mistakes Students Make Before Attempt 2**

- Giving mocks daily without analysis
- Ignoring weak sections
- Changing strategy every day
- Starting completely new topics late
- Comparing scores with others
- Carrying first attempt disappointment into second attempt

## **Exam Day Strategy for Attempt 2**

- Start with your strongest section
- Build momentum early
- Skip instantly if stuck

- Return later if needed
- Keep calm till the final minute
- Continue attempting till the end

### **Final Thoughts**

Attempt 1 tells you where you stand.

Attempt 2 gives you the chance to improve it.

Use mocks to fix mistakes, sharpen speed, and boost confidence. A student who deeply analyzes a few mocks often performs better than someone who blindly gives many tests.

Smart work wins.
